

PRESS RELEASE

BMZ Assumes Key Role in Shaping Modern-Sustainable Short-Distance Mobility

Karlstein, September 21st, 2021 – BMZ Group, as a global specialist in lithium-ion battery manufacturing, and the Swiss company Micro Mobility Systems are pleased to announce their cooperation in the production of the Microlino light electric vehicle.

BMZ designed and developed the lithium-ion battery integrated into Microlino's underbody and is the exclusive partner for series production, starting Fall, 2021. Microlino can be reserved online and will be delivered in Switzerland from this year and in Germany from 2022.

Microlino meets a sustainability-focused, price-conscious target group's needs, which maintains a modern, urban lifestyle. The iconic two-seater with stylish front entry particularly scores with its size-related excellent maneuverability. Thus Microlino fits in any parking space. With a top speed of up to 90 km/h and a range of up to 230 km, Microlino is designed for regular inner-city trips.

Microlino will enter the Swiss market by end of 2021 equipped with a 10.5 kWh BMZ battery. This will be followed by expansion into Germany, France and Italy. Variants with 6 kWh and 14 kWh will follow in the medium term. All planned Microlino variants thus fall into the light electric vehicle category L7e.

The globally active BMZ Group is working on the Microlino project across national borders. While the battery is developed and produced in Germany, BMZ China takes care of the on-board charger.

Sven Bauer, CEO, Founder and Owner of BMZ Group comments: "The cooperation with Microlino perfectly matches our BMZ corporate spirit. It stands for modern lifestyle and pioneership with highest quality expectations as an important contribution to the energy transition. We at BMZ see ourselves as THE GREEN ENERGY SYSTEM PROVIDER. We take Environmental Social Governance seriously and fulfill it by creating a crucial part of the infrastructure for an environmentally friendly lifestyle with the ongoing refinement of lithium-ion batteries."

"With BMZ, we have exactly the right partner for our battery system. There is probably no manufacturer with more experience in battery systems for micromobility and special vehicles than BMZ," says Oliver Ouboter, Micro Mobility Systems AG's Co-Founder.

PRESS RELEASE

About BMZ Group:

BMZ Group is a global player in the production of cross-industry lithium-ion system solutions. The group is headquartered in Germany and has additional production facilities in China, Poland and the USA, as well as subsidiaries in Japan, UK and France. There are also research and development sites worldwide. BMZ Group has more than 1,800 employees worldwide.

About Micro:

Micro develops innovative, urban mobility solutions for children and adults. It aims to contribute to a better urban lifestyle with its products. In 1999, Micro launched their first collapsible scooter. It was a huge success, selling millions. Joint ventures with various international brands have included the development of an e-scooter together with Mercedes and the development of a mobile suitcase with footboard developed in conjunction with Samsonite. Micro Mobility Systems AG was founded in 1996 by Wim Ouboter in Küsnacht near Zurich and has been family-run ever since. The company sells its products in 80 countries and in over 6,000 stores. In 2015, development started for the electric city car Microlino, led by Wim Ouboter's sons, Oliver and Merlin.
