BMZ Expands Portfolio with On-Board Chargers

Karlstein, October 21st, 2021 – BMZ Group, known as a global leader in lithium-ion battery manufacturing, is pleased to announce the addition of on-board chargers for the e-mobility industry to its portfolio.

BMZ has been designing, constructing and producing vehicle batteries for various well-known customers from the e-mobility industry for years. As a system supplier to the e-mobility industry, the BMZ Group meanwhile also develops precisely matching on-board charging solutions in addition to batteries individually designed for various vehicles.

On-board chargers (OBCs) are elementary components for the charging process of the battery in electric vehicles. OBCs authenticate the electric car at the charging station. They convert the alternating current from the charging station into direct current and provide communication between the vehicle and charging station.

Further information on the BMZ Group is available at www.bmz-group.com.

About BMZ Group:

BMZ Group is a global player in the production of cross-industry lithium-ion system solutions. The group is headquartered in Germany and has additional production facilities in China, Poland and the USA, as well as subsidiaries in Japan, UK and France. There are also research and development sites worldwide. BMZ Group has more than 1,800 employees worldwide.
